MARINE INNOVATION

Toliva have more than
25 years' experience in
Marine Cinema and
Audio Video Systems

Why use Toliva?

Technology is rapidly changing, and before you do anything you need to consider the integration of how your leisure and marine systems communicate.

With more than 25 years' experience we iron out the headache of today's sophisticated technologies and deliver you the best and most reliable systems available on the market to suit your budget and requirements.

Cinema - using display or projection we have successfully installed many interior and exterior cinemas on some of the world's finest yachts. Cinemas can be permanent or removable by the crew and stowed when not in use. Custom made projector and TV lift systems can be designed and manufactured for discretion and aesthetically pleasing installations.

4K Video Distribution - using either a multi input Video matrix or the latest video over IP, we can provide a suitable solution to get the very best image quality.

Audio Distribution - throughout the vessel in either stereo or surround sound, we use marine speakers designed to not only withstand the environment but also perform to the highest standard.

Linear Sound - throughout all external areas achieving even volume levels, fine tuned and calibrated by our audio engineers using the very best DSP's.

First Class Exterior Audio - designed to maximise enjoyment into the early hours, streaming music from the onboard library or DJ equipment.

Yacht Networks - designed to distribute the various means of internet access, proportioning bandwidth tailored to the clients requirements.

Control - of the audio and video as well as the lighting, blinds and temperature on board, simplifying the use of all these systems and bringing them together, all in one clear and easy to use layout on a touchscreen or remote control unit.

Our Services

We tailor solutions to your requirements and budget.

- AV Design, plan schematic drawings to pin configured technical drawings.
- Cable schedules and layouts.
- Project Management - paramount to a fluid installation.
- Installation - electrical, electronic and building services can co-ordinated for a harmonious installation.
- After Sales. First class after sales and warranty.

Testimonials

"Having worked with the team at Toliva on one of the best private cinemas in the country, I can confidently recommend them to bring the JBL Synthesis cinema experience to the home. Enthusiastic, professional and technically skilled with an eye for detail, we couldn't ask for a more capable partner."

Steve Rutherford : Harmon Luxury Audio EMEA, Chief Engineer in Charge of Europe and UAE
- was employed to calibrate the cinemas sound system.

"Having worked very closely over the Surrey residence and several other projects with Darryn Jacobs. We can say that they [Toliva] offer a professional service above and beyond the norm ... a high level of both design flare and acoustic knowledge into the room infrastructure and Darryn's knowledge of the technical installation is first rate. This can be witnessed in his very hands-on approach to both the sales and hands-on tool aspects of the work he carries out."

Mark Alcock : Technical Sales Manager, Karma AV

"The most stunning room in my house, the cinema is by far my favourite and experiencing this degree of AV quality is truly amazing."

Private Client

"Darryn and his team have been exemplary in every way. The Screening Room he designed and installed for us could not have been more perfectly suited to our requirements, and has been a source of tremendous pleasure to many people, as well as a vital work tool. We could not be more grateful for all he has done. Toliva's service is little short of extraordinary and no request is too small to merit immediate attention."

Lord and Lady Fellowes (Julian)

"Toliva was tasked with the design, installation and commissioning of the all new AV system onboard MY-Alicia during her extensive 4-year refit. Keeping with the yachts vintage theme and the owners desire for most components to be out of sight they produced a neat, reliable and comprehensive system with multiple audio and visual sources to ensure complete redundancy for any guest preference. Toliva selected the Savant Pro 8 control system which offers a visually appealing interface that is very easy to use and easily customized to feature the yachts living spaces. I find Darryn and his team an absolute pleasure to work with, knowledgeable and we experience great after sales service. I would be happy to recommend Toliva for any yacht AV installations or needs"

Matthew Beukes : Chief Engineer MY Alicia

"We have the home cinema we always dreamed of. Darryn and the team designed the room giving us great advice on the best equipment to meet our needs that. The planning and execution were exemplary. They do it all with the utmost professionalism, and attention to detail. We cannot recommend them highly enough."

Private Client

"We have worked with Toliva on a number of our developments and have always found the solutions recommended meet our requirements for audio systems within our high-end, luxury homes.

Darryn is very conscientious, offering great problem solving advice with advance knowledge of the latest technology. We look forward to continuing work with Darryn on future projects."
